## EFSA statement on the contamination of sunflower oil with mineral oil exported from Ukraine

The European Food Safety Authority (EFSA) received a fax on 28<sup>th</sup> of April 2008 from the European Commission, DG Health and Consumers requesting a rapid assessment concerning contamination of sunflower oil with mineral oils. EFSA took immediate action, and provided an initial view to the European Commission on the same day. This view was neither a risk assessment nor a fast-track advice and was only based on a limited set on data available at this point in time.

EFSA has received additional analytical data (see current analytical results) on the

## L'Aquila earthquake field team reports

8 May 2009

**Big earthquakes such as the L'Aquila tremor in Italy in early April cause fatalities and destruction, but they also provide a chance to learn more about earthquakes and their effect on modern and old buildings.**

Dr Susanne Sargeant, from the British Geological Survey, joined the Earthquake Investigation Team to assess the performance of buildings in the L'Aquila disaster area in April to assess the performance of

Earthquake damage to the Hotel Degli Abruzzi in L'Aquila.
